

# FROM DEATH FACTORY TO CULTURAL RENAISSANCE

Security dwellings zone and potential for future investment

Ultima Frontiera hotel and an example of reused prisoniers barn

The actual prisoners camp zone including the cooperative period and it's additions to the site, which will be used as the actual festival area

# Idea of investment logistics

### **RECYCLING**

The materials used in the region should be second hand reused materials. New ones are expensive and the budget should be preserved for the high transportation costs.

#### PARTNERSHIP INVESTMENT

The idea of collaboration between more cultural societies, national and international level, could be also a solution and a way of showing reusage examples.

The structures on the site can therefore be used throughout the season for multiple events.

#### **SPONSORSHIPS**

This kind of financiation is widely udes in Romania, espacially for cultural and sports organisations.

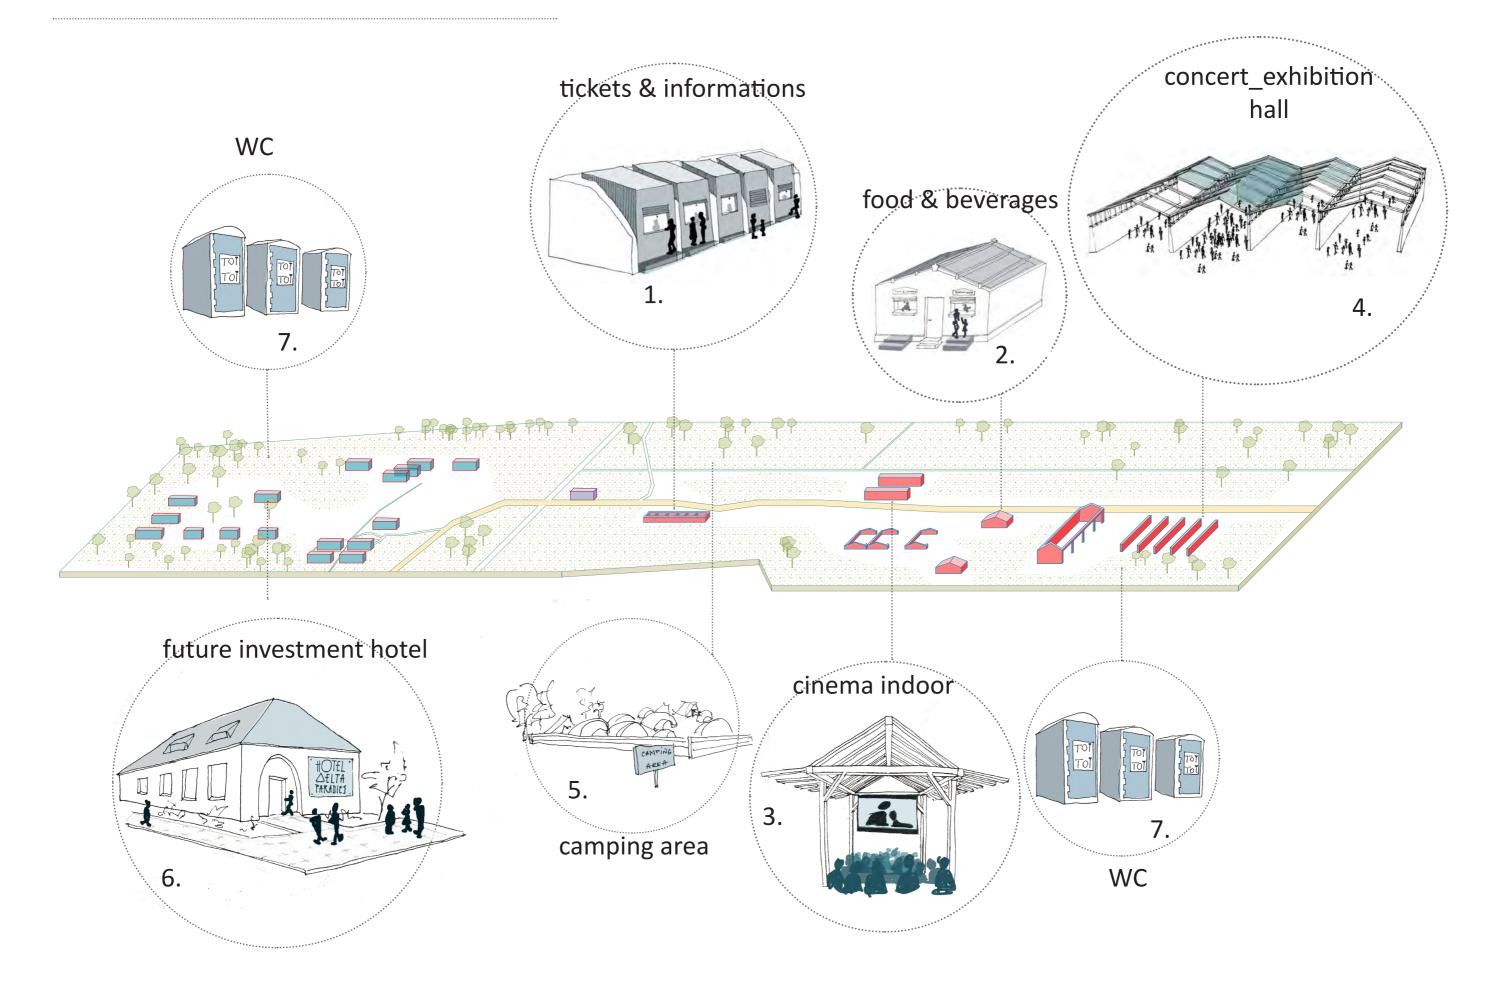

#### **LOCAL WORKERS**

This is an opportunity to involve the locals in the scheme and gain them a seasonal income at least, if not throughout the year

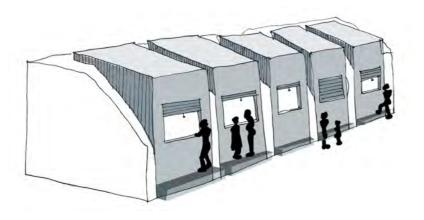

# **FESTIVAL MAP**

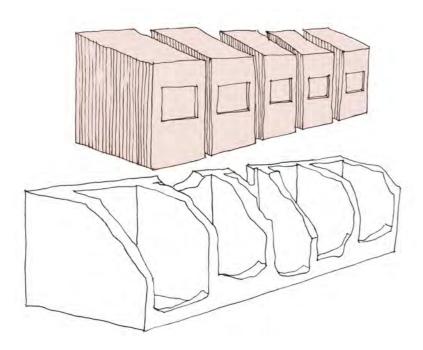

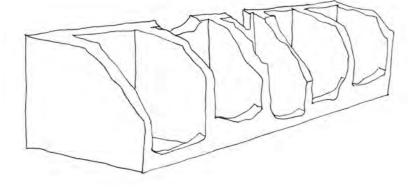

### Tickets & Informations

The idea to reuse the ruined brickwalls is by placing containers inside of them that are functional in various purposes, just like tickets and info kiosks.

They can be reused from ship containers that are out of service

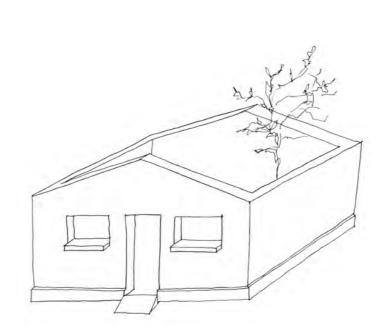

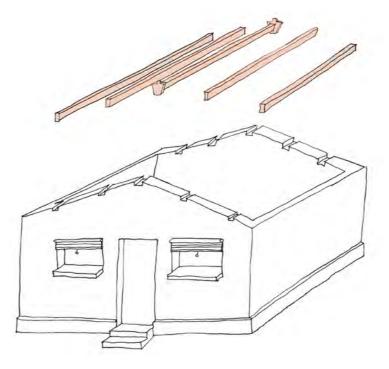

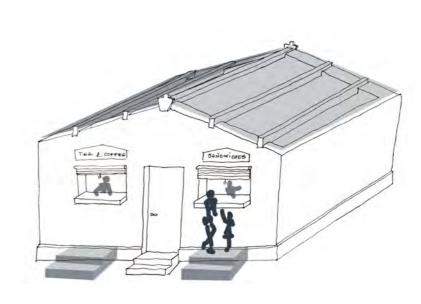

# Food & Beverages

The simple small scale spaces can be reutilized by recovering them permanently, they are suited for instance for food and beverages service.

# Cinema indoor

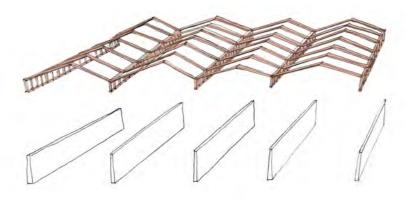

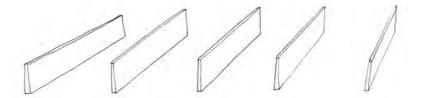

### Stage/Exhibition Barns

The 60's structures can be reused with a second hand wooden roof construction, wchich can then be covered with lkw folie. This would be a flexible, sustainable and easy transportable solution.

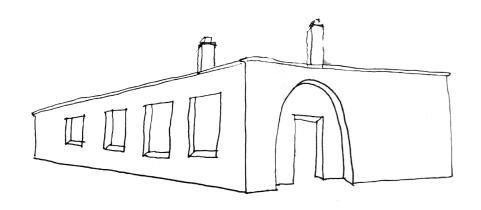

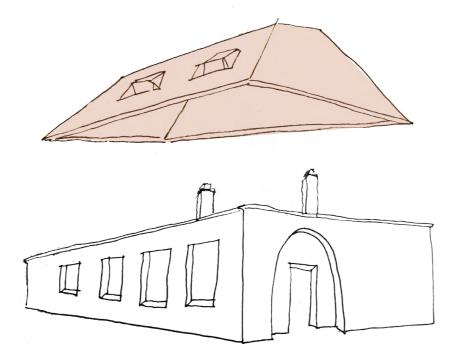

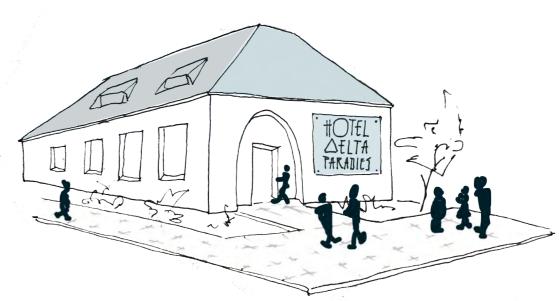

# Security dwelling renovated into hotel

This is the scenario for a future investment that does not necessarily need to be made in the first investmen phase.

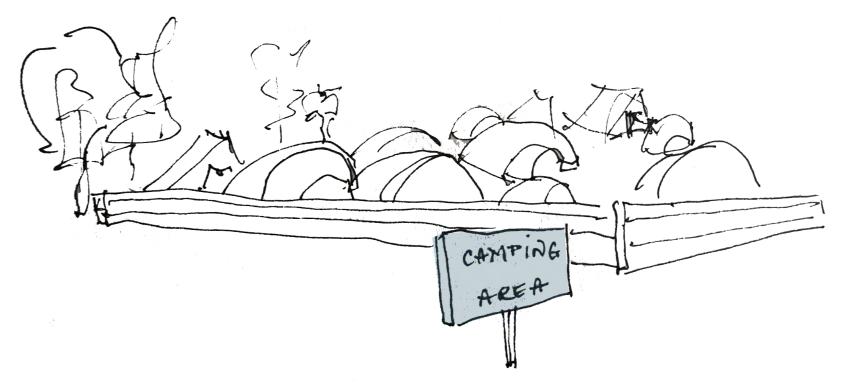

### Tent area

In the first yaers an easy way to accomopdate is simply by tents

# TOI TOI ARMY
